The diamond/gemstone weights colour and clarity are estimated; exact measurements could not be obtained due to setting restrictions. Based on the current value at the time of valuation and includes Australian Government taxes where applicable. This valuation is not suitable for any other purpose(s) than stated above and should not be relied on by any entity besides the addressee unless specifically noted. Due to the high probability, occurrence of unlabelled 'synthetic/implanted' parcels in the current local and international market of Laboratory grown diamonds with natural mined diamonds and high degree of difficulty identifying these stones, no liability is taken by the valuer and/or business named on the certificate/valuation/document, the identification is limited by restrictions imposed by the settings, size of the stones/stones and current equipment available to trade gemmologists. Whilst all due diligence is practised and stringent guidelines are adhered to for best practice, in accordance with the NCJV code of ethics, further advanced gemmological testing (at the client's expense) using specialised equipment may be required for positive identification.
