## Valuation for Traditional Retail Insurance Replacement

### Item 1

One, 18ct white gold, diamond set, flexible link necklet, of hand-assembled construction.

Feature three open concentric circles pendant. The two inner circles are inside a clear chamber, and in the centre of all the circles is one bezel setting, housing one round brilliant cut diamond, bezel set. The two inner circles and the bezel setting are articulated, and move around within the chamber. The pendant is finished with a fixed round bail, to the top. The pendant is suspended on a 'trace' link style chain that is finished with a medium parrot clasp.

Chain dimensions = 50.00cm (ave. length) x 1.30mm (ave. width).

Pendant dimensions = 35.00mm (ave. length) x 21.90mm (ave. width) x 4.90mm (ave. depth).

Polished finish.

Stamped '750 18K unknown makers mark' - acid tested as 18 carat gold.

The necklet contains:

One bezel set round brilliant cut diamond, clarity is "Vs", colour is "G".  
Dimensions = 3.15mm(Dia) x 1.92mm(D-estimated) x 2%(Girdle Thickness)  
Total Weight = 0.12ct (estimated - see NOTE below)

Total Item Weight = 19.56 grams  
Total Gemstone Weight = 0.12ct  
Total Metal Weight = 19.54 grams (estimated)

NOTE: Due to setting constraints, the exact dimensions of the gemstone cannot be ascertained. Therefore, weight of the gemstone is very much an estimation. For an accurate weight, colour, and clarity grading, the gemstone requires removal from the setting. The below replacement figure is based upon crafting a similar necklet employing similar materials and techniques being for a retail insurance purpose only. This figure does not represent the previous selling price of the item and will not be indicative of the resale value of the item.

The article(s) described above have been examined and the values given are an expression of our opinion on the date stated. Gemstones have not been removed from the settings for accurate assessment and all grades, weights, and dimensions are approximate, unless otherwise stated. Whilst all care has been taken in making this valuation, no liability is accepted other than to the person to whom the certificate is given for any errors or omissions, including any liability to the person by reason of negligence. This valuation is NOT transferable to any third person or party. Values expressed in Australian dollars (including GST) and are based on current market conditions. This valuation has been made with the standards and methods of the National Council of Jewellery Valuers, using accepted procedures, and systems advocated by this organisation. The values are based on the valuer's judgment of gemstone quality, mounting and manufacturing costs and are made to the best of the valuer's ability. A diamond colour grading of "F" (Rare White Plus) or better and a clarity grading of Vvs (or better), cannot be given to a set diamond. A valuation of a certified diamond is based upon the gradings provided on the certificate. The replacement figure of older cut diamonds is based upon the modern cut equivalent of same estimated weight, colour, and clarity. A valuation for Traditional Retail Insurance Replacement does not infer any saving on a purchase price and will not be indicative of the resale value of the item.
