Total Item Weight = 3.32 grams - Total Gemstone Weight = 0.95ct - Total Metal Weight = 3.13 grams (estimated)

NOTE: Due to setting constraints, the exact dimensions of the gemstones cannot be ascertained. Therefore, weights of the gemstones are very much estimated. For accurate testing, weights, colour, and clarity gradings, the gemstones require removal from the settings. The below replacement figure is based upon crafting a similar ring using all modern round brilliant cut diamonds of the same estimated weight, colour and clarity employing similar materials and techniques being for a retail insurance purpose only. This figure does not represent the previous selling price of the item and will not be indicative of the resale value of the item.
